💼 Work experience

IBM
Foster City, CA

Software Engineer   **07/2017 - present**

A product of IBM Watson's Commerce branch, I work on a product called Customer Experience Analytics. As a developer on CXA, I am involved in building the UI of a powerful analytics platform for businesses that merges in-store, web, and mobile presences of a customer base. Working with industry-respected frameworks and cutting edge technologies, I develop in AngularJS, D3.js and Javascript development tools such as Gulp to optimize my flow.

Apttus
Foster City, CA

Software Engineering Intern   **05/2016 – 03/2017**

As part of the main product team of one of the largest leaders in the CPQ field, I constructed and designed data- and content-dense features, pages, and flows. I worked as a developer in rebuilding one of the main pages of the product lifecycle. I implemented new features and resolved issues in an Agile fashion with a team of engineers at a Unicorn-grade company.

🎓 Education

University of San Francisco

B.S. in Computer Science   **08/2013 – 05/2016**
